

## INTERIOR DOORS | ENHANCING ARCHITECTURAL VALUE IN EVERY ROOM

VillaCrest™ Interior Doors provide a contemporary look with crisp, clean lines and boldly defined styles. Using classic stile and rail construction, each door is precision-crafted with distinct, architecturally correct joinery that results in greater depth definition.

### MILLWORK 360: THE DEGREE OF SUPERIOR QUALITY

We offer 24 standard style options for both paint and stain grade applications, as well as 13 integral or applied sticking profile options.

To eliminate warping and bending, stile and rail doors are built with engineered components that allow parts to naturally contract and expand with humidity changes.

Our door cores are eco-friendly and made from recycled wood by-products. We use only the highest quality premium mix of materials.

All of our doors can be pre-hung in wood frames using our wide selection of standard jamb and stop profiles, and shipped ready for installation – or they can be purchased as a slab only.

VillaCrest™ Interior Doors can be highly customized. You can add glass, mirrors, chalkboard, vented louvers or false louvers for a true sense of personal style.

Fire-rated doors and frames are available. Our fire-rated wood doors are available in 20 thru 90 minute ratings matching the design style and profiles of most of our non-rated doors.

### HAVE A CUSTOM INTERIOR DOOR PROJECT IN MIND?

Let Millwork 360 help you turn your vision into a reality.
